I would like to point out that the windows file manager, not gsync, can see the usb3 drive with the hard drive installed.I would not use the gsync, see the file manager's properties of the drive.Interference with a clock gene in *Saccharomyces cerevisiae* alters the timing of cell cycle and induces iron-dependent stress response. Cyclins and their cognate cyclin-dependent kinases (CDKs) play critical roles in regulating the G1/S and G2/M transitions of the cell cycle. The *Saccharomyces cerevisiae* CDC5 gene encodes a G2/M cyclin. Deletion of the CDC5 gene causes arrest of cell growth at the G1/S boundary. We show that disruption of the CDC5 gene causes a G2/M delay of a few cell cycles, which is caused by reduced expression of the CDC28 gene. Expression of CDC28 is transcriptionally repressed by a transcription factor, CLN3, which is under the control of the CCW12-CLN1-CLN2 oscillator. We have investigated the cause of 82157476af
